

MICHAEL ZIMPFER, M.D., M.B.A, professor Vienna Medical Center – state-of-the-art medical expertise and technology

The Vienna Medical Center, founded and headed by Michael Zimpfer, attracts national and international patients, either with preventive medicine or in dealing with specific disease states. We present some of it's key partners of various medical disciplines.

The center is located within walking distance to the Vienna General Hospital, (Allgemeines Krankenhaus), and the St. Anna Children's Hospital (St. Anna Kinderspital). There are also a number of private hospitals nearby, including the Vienna private clinic (Wiener Privatklinik), private clinic Josefstadt (Confraternität – Privatklinik Josefstadt) and the Goldenes Kreuz private clinic (Krankenanstalt Goldenes Kreuz).

In addition to his own diagnostic and therapeutic expertise, by creating the Vienna Medical Center, Zimpfer has established an effective, internationally linked, holistic healthcare platform. On offer, are international video consul-

tations and where necessary, working with a team of leading medical specialists. The consultants are drawn from a wide background and offer a unique range of expertise (see their respective biographies and international medical training on the following pages). In addition to its own dedicated team of specialists, the center works closely with local and internationally renowned specialists, e.g., oncologists, radiologists, cardiologists, obstetricians/gynaecologists, paediatricians, neurologists, technical experts, physical therapists and manual therapists.

This network and numerous co-operations, such as with the Clinic Otta-

MICHAEL ZIMPFER, M.D., M.B.A, professor,
(www.zimpfer.at)
